DISCLAIMER

All possible care has been taken in the preparation of this user guide. However, specification and particulars in relation to the product referred to in this document are subject to change without prior notice. Some photographs contain samples which are representative only. This unit may vary in colour and appearance. Yarl Technologies will not be held liable for any errors or omissions in this document.

1

CONNECTING A POWER SOURCE TO DGTAL

The unit can be powered from the AC adaptor and/or batteries.

To use the AC adaptor:

1. Connect the AC adaptor to the wall outlet and connect the other end of the cable provided to the DC power socket located on the back panel of the unit.

NOTE: If the AC plug is not compatible with the wall socket, use the add-on adaptor provided to interface with the wall socket.

To use batteries:

1. Remove the battery cover on the underside of the unit
2. Carefully note the correct orientation of the batteries displayed on the inside of the battery compartment. Install four AA-size batteries into the compartment according to the orientation shown.
3. Close the battery cover.

NOTE: Either AA/LR6 alkaline batteries (such as those provided in the kit) or rechargeable AA NiMH / NiCd batteries may be used.

If both power sources are available, the unit will use the AC source and the batteries will be used as a backup source. However, it is recommended that the batteries be removed from the unit when the AC source is being used often.

**WARNING**

- If batteries are installed in the incorrect orientations, damage to the instrument and to the batteries may result.
- Dispose of old batteries at your local battery disposal centre.

Figure 2.1 Main Controls - Top Panel

Figure 2.2 Auxiliary Controls - Back Panel

3

TURNING DGTAL ON/OFF

To turn on:

Press the power switch on the back panel to turn on power. The display will show the version number and the model name for a few seconds. Then it will display the screen shown in Figure 3.1.

Figure 3.1 Initial display

To turn off:

Press the power switch on the back panel to turn off power.

4

PLAYING/STOPPING A THĀLAM

To play:

Press the centre (●) button to play the selected THĀLAM. The symbol at the top right-hand corner of the screen will change from ■ to ►.

To stop:

Press the ● button to stop the THĀLAM being played. The symbol at the top right-hand corner of the screen will change from ► to ■.

NOTE: Do not press and hold the ● button for too long.

To adjust the volume:

Turn the volume control dial on the back panel clockwise and anti-clockwise to increase and decrease the volume respectively.

5

READING THE DISPLAY

The graphic display conveys important pieces of information. This can include a combination of the following elements:

- Details of a particular menu selection → centre of top-half of the screen
e.g.

**CHATURASRA JĀTHI
THRIPUTA THĀLAM**

- The GATHI of the THĀLAM → bottom left-hand corner of the screen
- The LAYAM of the THĀLAM in MATHRA (beat) per minute (MPM) → bottom right - hand corner of the screen
- The beat pattern of the THĀLAM → bottom centre of the screen
- ►/■ symbols indicating the current mode of operation → top right-hand corner of the screen
- Arrow symbols (▲▼◀▶) and • indicating possible buttons user can press to make a particular selection

6

NAVIGATING THE MENUS

6.1 NAVIGATION CONTROLS

The navigation controls are shown in Figure 6.1. The arrow buttons are used make selections while the centre (●) button is generally used to play/stop the selected THĀLAM. However, the centre button may also be used to store particular selections as default selections in some cases.

Figure 6.1 Navigation Controls

6.2 ADJUSTING GATHI AND LAYAM

While a THĀLAM is playing, the GATHI and the LAYAM can be adjusted using the arrow buttons introduced in the previous subsection: 6.1 Navigation Controls.

To adjust the GATHI:

Use the ◀/▶ buttons to change the GATHI, as shown in Figure 6.2. The available selections are 1 KALAI, 2 KALAI, 3 GATHI, 5 GATHI, 7 GATHI, 9 GATHI.

NOTE: When playing CHĀPPU THĀLAM, GATHI is set to 1 KALAI and cannot be adjusted.

To adjust the LAYAM:

Use the ▲/▼ buttons to increase or decrease the LAYAM respectively, as shown in Figure 6.2. The LAYAM is displayed as MĀTHRA (beats) per minute (MPM) available selections range from 120 MPM to 480 MPM.

Figure 6.2 Adjusting GATHI and LAYAM

NOTE: When the unit is turned off, any adjustments made to the GATHI and LAYAM will be lost and when the unit is turned back on, the default GATHI and LAYAM will be loaded instead. To customize the default settings for GATHI and LAYAM, refer to subsection 6.3.5 Default Settings.

6.3 SELECTING A THĀLAM

While a THĀLAM is not playing, the user can navigate through the various THĀLAM selections. The diagram shown below illustrates how to navigate the Main Menu using the ▲/▼ buttons.

One of the main features of the unit is that it offers the option of quick-selecting 5 of the most commonly used THĀLAM in Carnatic music. Another feature of the unit is that it allows the user to select between 35 THĀLAM (of which there are 7 THĀLAM and 5 JĀTHI for each THĀLAM) and 6 CHĀPPU THĀLAM.

The menu item DEFAULT SETTINGS allows the user to change and store new values to the default settings. Each of these menu items are described in the following sections.

6.3.5 DEFAULT SETTINGS

To change the default settings, navigate to the corresponding Main Menu item as detailed in section 6.3. Then use the ◀/▶ buttons to navigate the DEFAULT SETTINGS sub-menu as shown in the diagram below.

NOTE: Hold down the ◀/▶ buttons to scroll through the sub-menu items and release when the desired DEFAULT SETTING is displayed.

Figure 6.8 Navigating the DEFAULT SETTINGS Sub-Menu

To change the GATHI / LAYAM default settings:

1. Use the ◀/▶ buttons to navigate to the LAYAM Default Settings Sub-Menu item (The screen will now display Figure 6.9)
2. Press the ● button (The screen will now display Figure 6.10)
3. Use the ◀/▶ buttons to change the GATHI. The available selections are 1 KALAI, 2 KALAI, 3 GATHI, 5 GATHI, 7 GATHI, 9 GATHI.
4. Use the ▲/▼ buttons to increase or decrease the LAYAM respectively. The LAYAM is displayed as beats per minute (BPM). The available selections range from 120BPM to 480BPM.
5. Press the ● button to store new settings as default settings (The screen will now display Figure 6.9)

NOTE: Hold down the ▲/▼/◀/▶ buttons to scroll through the available selections for KALAI and LAYAM and release when the desired selections are displayed.

Figure 6.9 GATHI and LAYAM Default Settings Display

Figure 6.10 Changing GATHI and LAYAM Default Settings Display

To change the SRUTHI default settings:

1. Use the ◀/▶ buttons to navigate to the SRUTHI Default Settings Sub-Menu item (The screen will now display Figure 6.11)
2. Press the ● button (The screen will now display Figure 6.12)
3. Use the ▲/▼ buttons to increase or decrease the SRUTHI respectively. The SRUTHI is displayed as KATTAI. The available selections are from 1 KATTAI to 6.5 KATTAI in 0.5 KATTAI intervals. (The unit will play a sample sound of the selected SRUTHI)
4. Press the ● button to store new settings as default settings (The screen will now display Figure 6.11)

NOTE: Hold down the ▲/▼ buttons to scroll through the available selections for SRUTHI and release when the desired selections are displayed. Hold down the ◀/▶ buttons to replay the sample sound of the selected SRUTHI.

Any changes made to the DEFAULT SETTINGS have been stored. When the unit is turned off and turned back on, the new DEFAULT SETTINGS will be loaded.

7

MAINTENANCE OF DGTAL

Proper maintenance of the unit and accessories is required to prevent unwanted damage.

- Store the unit in a cool, dry place.
- To clean the DGTAL unit or the carry case, use moist cloth. DO NOT use spirits, alcohol, thinner, turpentine. These solvents could react with the material and cause damage to the surface.
- When storing the unit over a long term period, it is recommended that the batteries be removed from the compartment and stored in the respective slots in the carry case. This should prevent acid leakage from the battery into the unit.

If the DGTAL unit does not work or behaves unusually; carry out the following tests before contacting Yarl Technologies with the problem and the results of the tests. This will aid Yarl Technologies in diagnosing the problem.

Problem: Display is blank and pressing any button does not turn on any of the lights.

Tests:

1. Is the power switch on the back panel of the unit pushed in completely?
2. Is the power adaptor plugged into the wall socket and turned on? – If so, does the adaptor power indicator turn on when the switch at the power outlet is turned on?
3. If operating on batteries, does the problem persist if the batteries are replaced?

Problem: Display is blank but pressing the ● button turns on the lights and plays ĀDHI THĀLAM.

Tests:

1. Turn on the power, press the ◀/▶ buttons and then press the ● button. Does a THĀLAM, other than ĀDHI THĀLAM, play?
2. If operating on batteries, does the problem persist if the batteries are replaced?

Problem: Display shows ĀDHI THĀLAM but pressing any button does not turn on the lights or play a THĀLAM.

Tests:

1. Press the buttons on a side and at an angle. Does the display change?

Problem: When playing a THĀLAM there is no sound.

Tests:

1. Is the volume control dial turned fully clockwise?
2. Are the SASABDA Default Settings set to SASABDA (and not to NISSABDA) for all three elements of the selected THĀLAM?

Problem: When playing a THĀLAM some or all of the LED lamps do not turn on.

Tests:

1. **Select and play a different THĀLAM. Do the same LED lamps remain turned off?**

9

TECHNICAL SPECIFICATIONS

LED Lamps	170° viewing angle, 6m viewing distance under daylight conditions, intensity 600mcd
Beat Deviation	+/- 24 μ S deviation within beats
LCD graphic display	120° viewing angle, 6 O'clock viewing direction, backlight (white or green/yellow), sleep mode after 20 seconds
Audio	2W, 8ohm, 40mm speaker, earphone with 1.8 metre cable, frequency response: 200Hz – 12kHz
SRUTHI range	1 KATTAI to 6.5 KATTAI (2093Hz to 3951Hz)
Power rating	300mW, 60mA @ 5Vdc (under test conditions)
Power sources	4 x AA/LR6 2350mAh alkaline batteries (included in the kit). 4 x AA NiMH / NiCd 2000mAh rechargeable batteries 100Vac to 240Vac, 50/60Hz, 9Vdc adaptor with 2 metre cable (included in the kit).
Battery life	On 2350mAh battery, continuous playing time is approx 32hrs (tested with sound volume set very low)
Operating Temperature	0 – 40 °C (32 – 104 °F)
Operating Humidity	10 – 90%
Dimensions	DGTAL Unit 208(W) x 145(D) x 32/52(H) mm Carry Case 320(W) x 200(D) x 55/70(H) mm
Weight	DGTAL Unit: Approx. 400g (excluding the batteries) Carry Case: Approx. 900g (including DGTAL Unit, AC/DC adaptor, add-on adaptors, ear phone, batteries)

Warranty only applies to situations where a defect has arisen, wholly or substantially, as a result of faulty manufacture, parts or labour. Warranty is valid for **12 months from the invoice date**. Warranty is rendered void if the product is serviced or modified in any way by an unauthorized service agent.

The warranty does not apply to situations where damage is caused by other factors or negligence, including without limitation:

- Wear and tear from use
- Surface damage such as scratches, cracks and stains
- Accidental or intentional abuse and/or mishandling of the product
- Failure to follow operating instructions
- Direct exposure to elements of the environment such as sun light, rain and lightning strikes
- Battery acid leakage, exposure to liquid substances or infiltration of foreign particles

Upon contacting Yarl Technologies with the problem, Yarl Technologies will diagnose the problem and provide a suitable solution in a timely manner. This may require transport of the damaged product to and from Yarl Technologies. Any loss or consequential damage incurred during transportation is not covered by this warranty. **These costs will be borne, in full, by the client.**

Keep this User Guide for future reference.
